RMB-SM Surface Mount Removable Bollard

General Description

OPTIMA removable bollards are acting like fix bollards however they can be removed manually by hand. They are designed for vehicle entrances, army, industrial, governmental and commercial buildings or streets which are closed to vehicle traffic between certain hours of the day.

RMB-SM Surface Mount Removable Bollard has internal locking hardware. Key-lock system is located on the upper part of the bollard. Because of its aesthetic design, it can be installed at any modern building. A surface mounted bollard is installed directly on the road, therefore it does not need any excavation or civil works. All parts are hot dip galvanized and RAL 7012 electrostatically powder coated.
